FORD

The Universal Car

Weak Links in a Strong Chain

That's just what imitation parts are when they become a part of your Ford car. They look strong enough, but the metal isn't there—the strong, durable Vanadium steel that goes into the Ford chassis and every Ford part. Ford parts are specially cast and heat-treated, each according to the use. Some require a hard, flint-like wearing surface, others need resiliency, and some need just "toughness."

Ford metallurgists have been studying these problems for sixteen years and know just how each unit should be made to endure a maximum of wear and tear. They know that best results can be obtained only by the use of special formulas for different parts, and that honest Ford parts wear from thirty-five to one hundred per cent. longer than counterfeits.

We carry complete assortments of genuine Ford parts for both passenger cars and trucks. And our garage is equipped to give careful, prompt Ford service—from minor adjustments to complete overhauls. Drive in, it's better to be safe than sorry. Come to the Authorized Ford dealer for service.

HAD HIS DOUBT.

"Do you believe what you read in the papers?"

"Not always," answered Farmer Corntossel. "Sometimes I have my doubts about it."

"Because I am crazy for a car and need it could you buy me a motor auto machine?"

"Why, yes, I suppose I could."

"Then I am sure that was very generous of you, and I say, all the more generous because candles are so high and you have her cake."

"Intelligence."

Patient—Do you think the patient has insomnia making it ordered?

Assistant Nurse—Yes, doctor, but he got so mad whenever I woke him up to give it to him.

Where Mystery Reigns.

Biggs—What do you usually eat in this restaurant?

Higgs—Don't ask me; ask the cook. I simply order from the menu.

Natural Affinity.

"Why is it that widow seems to attract the horsey element?"

"Probably because she is a grass widow."

TEST OF NERVES.

First Doctor—How are that patient's nerves?

Second Doctor—Fine; he can read all the headlines in the daily paper now without a tremor.

Think of Others.

"Why don't you think of what fun the others get, just be an altruist?"

An Agreement.

"The court gave that convicted rascal a suspended sentence."

"So did the lynching mob. They hanged him."

Not in the Race.

Rella—I wouldn't marry the best man on earth, of course, you wouldn't. Somebody else long ago bent you to it.

An Enthusiast.

"Cleanliness can be carried too far."

"Impossible."

"It can. If I don't stop her, my wife would scour the lettuce with soap."

One Assurance.

"Do you think the tale Miss Flirty told you was made up on the spur of the moment?"

"Maybe not, but she was."

Often in One.

Hock—My wife has a great fondness for pets; has yours?

Mock—That depends on whether you refer to animals or the mood.

Its Financial State.

"That couple have just come back from their wedding trip dead broke."

"Ah! So the honeymoon has got to its last quarter."

Exact Locality.

Lawyer—Officer, did you catch the prisoner in flagrante delicto?

Policeman—No, sir; I caught him in the back alley.

Pertinent Illustration.

"What have you there?"

"A booklet entitled, 'Short Cuts to Riches.'"

"Ah! I see there's a mountain of dollars on the cover. To be consistent, there should be the picture of a penitentiary on the back."

Why He Was Sent to Bed.

"Pa, what is an anarchist?"

"One who thinks there should be no government and no authority, my son."

"Then, pa, is ma an anarchist?"

Too Comprehensive.

"Of course," said Senator Sorghum, "I approve of freedom of speech; but I don't like our colleague's idea of it."

"What is his idea?"

"The universe as an audience and eternity as the time limit."

Missed Opportunity.

"I read the other day where a woman dislocated her jaw by yawning and became speechless."

"And I have been trying to break my wife of yawning because it seemed such a rude habit!"

A Surmise.

"What busted Cholly?"

"Dunno."

"He was apparently doing well selling tips on the stock market."

"Maybe he got to playing his own tips."

A Whole Lot.

"Cholly, do you love me?"

"Sure."

"A whole lot?"

"Listen here, girl. I think I love you nearly as well as you love yourself."

DISTINCTIVE *Printing*

¶ Printing that will attract attention and put your advertising in a class by itself—printing that contains originality in conception and excellence in its execution—this quality of originality and individuality characterizes all the printed work we turn out.

Advertising?

If it is results you want you should use this paper. It circulates in the majority of homes in the community and has always been considered

The Family Newspaper

The grown-ups quarrel about it; the children cry for it and the whole family reads it from cover to cover. They will read your ad if you place it before them in the proper medium.

Thrashing Machine Fires.

Special Dust Collector Prevents Danger.

Instances of spontaneous combustion in the separator of threshing machinery are reported by insurance companies in the Pacific Northwest. Now equipped with a dust collector, which prevents the accumulation of dust in the separator, and a fire extinguisher adjusted to operate automatically, gives the thresher a protection nearly absolute. Eventually this protection will greatly lessen the insurance risk, which hitherto has been the prohibitive rate of $30 to $300 on each $1,000 of property insured. And this rate is only for a 60-day run.

Produce Results.

Now it appears that the fatal project of the bureau of chemistry, plant industry and markets is to produce special results in (1) protection from fire and explosion and a decrease in insurance rates; (2) the elevator or grain particularly smut; and (3) the cleaning of wheat smut through.

tion of the smut spores by dust at the time of threshing. This method reduces the wind dissemination of spores which otherwise would be blown out of the wind stacker to infect the fields.

DESTROY WEEDS IN THEIR INFANCY

Easy Matter to Eliminate Plants From Various Kinds While Very Beginning.

Weeds like other things, are most easily destroyed in infancy. This being true, they can best be eliminated from cornfields, gardens, potato patches and elsewhere by destroying them just as soon as they make their appearance. The harrow and the weeder are most usual implements in accomplishing this task before plants are large enough to cultivate.

It is surprising how much good and how little harm will be accomplished even after the corn, potatoes and other plants get well started, by going over the fields with the harrow with teeth slanting, or, preferably, the weeder.

REMEDY FOR CABBAGE WORMS

Government Expert Favors Arsenate of Lead and Paris Green for Killing Pests.

A government expert says the best remedies for the cabbage worm are arsenate of lead and paris green. The former being cheaper at the present time is recommended at the rate of two pounds in powder form or four pounds in paste form to 50 gallons of water. Adhesiveness is enhanced by the addition of the same amount by weight of crude resin soap or resin-fishoil soap.

The best form of spraying machinery should be used, with special attention to nozzles in order to secure a mistlike spray.

The arsenicals are harmless when properly applied as directed.

MANY VINES PREFER FENCES

Such Plants as Cucumber, Squash, Melon and Pumpkin "Do Better on Some Kind of Trellis.

The cucumber, melon, squash and pumpkin vines, you will find, have high ideals, and would rather climb on the fence or trellis than run on the ground. It will be necessary to support by cords or rags the heavier varieties of melons and squash. Again, the squash bug expects to find his favorite food on the ground.

Cheaper Than Beef.

In many parts of the country, especially on farms, chicken is probably much cheaper than beef, as only the cost of production has to be considered.

Raise More Poultry.

Raise all the chicks and turkeys you can this year. The prices for poultry products will remain about on the par with feeds, so you will be sure of good returns for your labor.

Leghorns Are Immune.

If there is danger of hogs catching your fowls, raise leghorns, for they will fly away if there is no other way out.

Buy the Best.

When buying pure-bred fowls do not seek "culls," but endeavor to secure those that are good.

No Drink Like Water.

A plentiful supply of clean, fresh water must always be available to the hens. The fowls drink freely.

Motor Trucks Are Economical

"Transportation Problems

of Trucks" explains why farmers

[illegible] work

[illegible] Write for it.

CARING FOR [illegible] CALS

Whenever Tuberculosis Is Discovered Cow Should Be Separated From Healthy Cattle.

A cow infected with tuberculosis should be separated from healthy cattle as soon as the disease is discovered as, otherwise, she is constantly a medium for the transmission of the ailment to her mates. It is imperative that no newly purchased animals be introduced into a healthy herd until they have successfully passed a thorough tuberculin test administered by an experienced veterinarian.

"ELBOW GREASE" IS APPLIED

Really Good Gardener Will Coax Roots of Plants to Go Deep and Far for Moisture.

A really good gardener will work with bright tools and plenty of "elbow grease." With correct application of water if it does not rain, he will coax roots to go deep and far for food and drink, thus insuring vigorous root systems.

Eliminate Male Birds.

Eliminate the male bird at end of hatching season. Fifteen million dollars is lost each year by allowing the rooster to run with hens during the summer months. Produce the infertile egg.

Nests the Hens Like.

Hens will lay in an enclosed nest rather than in an open nest. They prefer the nest with an egg in it and the home-made nest egg of plaster of paris is preferred to the china egg or even real eggs.

Handling Summer Flock.

In the management of the summer flock an important requisite is that the house be cool with an abundance of fresh air.

Canned Sweet Corn.

About one-third of the sweet corn canned in this country comes from Iowa and Illinois.

Keep Brood Coops Clean.

The brood coop should be cleaned at least once a week and kept free from mites.

Very intimate relations exist between the sun and digestion. Digestion and assimilation become weak and imperfect if the man or animal is not freely exposed to the direct rays of the sun. No plant or animal can digest in the dark. Plant a potato in your cellar. If there is a little light, that potato will sprout and try to grow. But surround it with the best manure water and do the best for it, only you shall keep it in the dark, it cannot digest and grow. See how slender and pale it is. Now open a window in another part of the cellar, and notice how the poor, hungry thing will stretch that way. Or give the stalk a little twist, and see how it will lie down. It can't raise itself again. No matter how much food and drink you give it, it can't digest. The process of digestion, the great function of assimilation, can't go on without sunshine. Did you ever notice that grain growing under trees is not so large and does not fill as well as that growing in the open where there is plenty of sunshine?

The white light of the sun is a most powerful inhibitory agent for the growth of all forms of microscopic life. Somehow the actinic rays of white light, the same that cause the change in the silver salts in photography, are able to initiate alterations in the chemical constituents of microbes that eventually lead to their complete destruction. The improvement in health among the poor of our large cities, as the result of letting the light into the tenements, shows how much good the great solar scavenger can accomplish even under unfavorable circumstances.

Lack of sunshine tends to mental depression. It is astonishing how our mental condition is improved; how we feel more inclined to work and take outdoor exercise, on sunny days. So great an authority as Dr. Arnold Lorand, physician to the baths, Carlsbad, Austria, says: "Let us be grateful for every ray of sunshine, and take advantage of it. Some ladies avoid the sun, but it would be wiser to seek it and, if possible, to expose our whole bodies to its rays. Let us remove all the curtains from the rooms in which we sleep or sit, especially from our workroom. In the train let us sit on the sunny side and not draw the curtain, unless we are reading; in short, let us seek the sunshine wherever it shines. We shall soon observe how much better we feel after a long sojourn in the sun. There is no denying that, as a rule, those who spend much time in the sun look better and healthier than those who live in dark rooms or offices." Particularly in old age is sunshine precious, and instinct tells old people that the sun is good for them, and they eagerly watch for it to shine.

LEARN HOW TO LIVE.

Health Notes

It is not only the part of expediency but morally imperative for every one to do all that lies in his power to be well, steadily and joyously well.

One of the principal benefits derived from a vacation at the seaside is the comparative freedom one may have in dress, which may be adapted to expose the body to the sun's rays.
